

TIPS OF THE TRADE

AVOID SALT CONTAMINATION FROM ABRASIVES

Test for salt on the substrate using a Chlor*Test Kit

- A compact portable field test
- Simple to use
- Fast and accurate results in minutes
- Safe handling - no needles or syringes
- Measurement range: 1 ppm to 50 ppm
- Supplied in a pack of 4 test kits.

The surface must not read higher than 9 ppm.

Remember – Salt on the substrate will affect coating adhesion!
