

BNV-6 WORKHEAD COMPLETE KIT

APPLICATIONS

Perfect for use in areas where no dust or mess is tolerated. Suitable for removal of toxic paints like lead.

DESCRIPTION

Integrity of operation requires that operator keep the brush seals in contact with the work surface. This blast and vacuum tool has four wheels which help the operator keep a good seal on the surface. Uses an inner and outer set of replaceable brushes to provide a seal against the work surface.

FEATURES AND BENEFITS

- Blast and vacuum workheads can be attached to most standard blast machine
- Requires a separate vacuum source to keep the workhead under negative pressure
- Recovers abrasive and blast debris
- Flexible base and wheels
