

SnakeBite XQ world's safest and quietest blast nozzle, easier to use hands down.

Blast nozzle thrust and noise is a significant issue for the abrasive blasting industry. Remaining compliant to workplace health and safety regulations is a challenge, especially when blasting in noise sensitive areas.

Regulators and industry bodies have had an increasing focus on the impact of blasting hazards and risks to workers, by-standers and the environment. The cost of delayed production, fines or injury to workers can be significant.

The answer is the SnakeBite XQ by BlastOne.

SnakeBite XQ by BlastOne An Extra Quiet Blast Nozzle.

LOW NOISE REDUCES YOUR RISK OF HEARING LOSS

The SnakeBite XQ reduces noise generated by up to 16 dBA – that's equivalent to up to 75% quieter than standard nozzles, and the typical high pitched screech is now gone.

Reduce the risk of operator and bystander hearing related injuries and increase your ability to comply with workplace noise regulations.

BLAST LONGER AND LATER IN NOISE SENSITIVE AREAS

Start blasting operations earlier and finish later with reduced noise impact on noise sensitive areas.

Reduce noise related exclusion zones in workshops, areas adjacent to blast rooms and site blasting operations. This will provide increased access and flexibility.

Reduce or eliminate sound absorbing barriers when blasting operations are conducted close to noise sensitive locations.

REDUCE THE RISK OF INJURY TO OPERATORS

Lower nozzle thrust reduces operator strain and increases the ability to control the nozzle – reducing the risk of manual handling related injuries and injuries related to loss of nozzle control.

Importantly operators will have more energy at the end of the day improving their quality of life.

LOWER NOZZLE THRUST REDUCES OPERATOR FATIGUE

The unique design of the nozzle and silencer reduces nozzle thrust by up to 45%. Operators can better manoeuvre the nozzle across the surface and will be less fatigued over the shift and on an ongoing basis – a key factor allowing high cleaning rates to be achieved throughout the shift and project.

Nozzle thrust reduces to that of a nozzle two sizes smaller when the silencer is fitted. Using a no. 7 SnakeBite XQ feels like you're using a standard no. 5 nozzle.

EASY TO USE

Noise and nozzle thrust reduction occur automatically across a wide range of operating pressures 90-110psi – simply screw on the silencer and away you go.

Slimline ergonomic nozzle jacket design reduces operator hand fatigue.

POWERFUL. STRIKING. QUIET.
BUT JUST ONE BITE WILL DO THE JOB

**A super quiet silenced abrasive blast nozzle
delivering improved workplace safety compliance
ideal for blasting in noise sensitive areas.**

UP TO **16dBA**
NOISE REDUCTION

Reduce noise by up to 16dBA
across a wide range of
operating pressures.

UP TO **45%**
LESS OPERATOR FATIGUE

Significantly reduce operator
fatigue with the worlds
lowest thrust blast nozzle.

EXPERIENCE THE DIFFERENCE

An entirely new operator experience. It feels different, it sounds different – and let's face it, it looks fantastic! There is no other nozzle like it.

The ultimate production tool that delivers contractors and asset owners lower noise, lower operator fatigue and improved project outcomes, ticking the box on the key challenges faced by the blasting industry today.

POWERFUL. STRIKING. QUIET.
