

PREVENT SMALL ISSUES FROM BECOMING MAJOR PROBLEMS

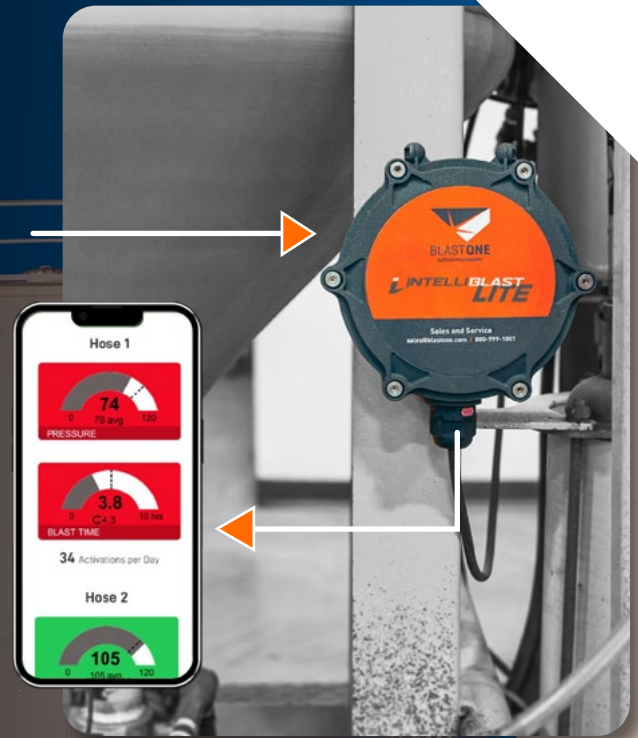

INTELLIBLAST LITE GIVES YOU INSTANT ALERTS ON REAL-TIME PERFORMANCE

INTELLIBLAST LITE

Most blasting crews lose 10–30% productivity to silent issues like:

- Low pressure
- Idle pots
- Untracked time-on-tools

IntelliBlast™ Lite exposes what others miss—so you can take control, cut waste, and finish jobs faster.

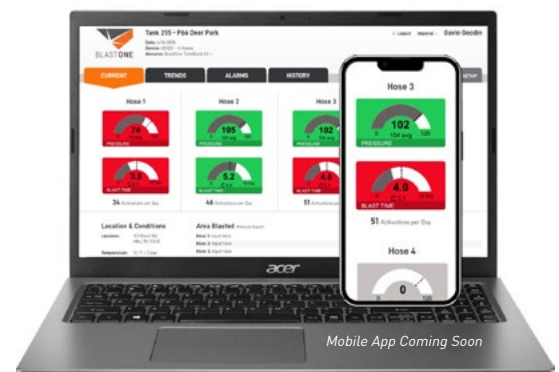

DID YOU KNOW Every 1 PSI below 100 costs you 1.5% in productivity. IntelliBlast™ Lite alerts you before it adds up.

ENSURE OPTIMIZED PERFORMANCE

- Tracks every nozzle (1–4 outlet systems)
- Monitors blast pressure
- Foresee problems and breakdowns
- Track Time-On-Tools w/ project timeline

STOP GUESSING—START MEASURING

- 90% of foremen overestimate time-on-tools
- Every hour, every PSI, and every pound of abrasive affects your bottom line
- IntelliBlast pays for itself by reducing downtime, rework, and improving crew productivity.
- Stored *performance history* helps estimators on future bids

REAL-TIME, REMOTE MANAGEMENT

- Cloud-based online dashboard + mobile access
- Installs on any blast pot—no mods required
- Live data on blast pressure, idle time, time-on-tools
- Monitor unlimited jobsites from the comfort of home, office, or even while on vacation
- Know exactly when and why teams are productive—or not

Know Your Crew's True Productivity

IntelliBlast Lite acts as your
project's Check Engine Light.

“With IntelliBlast Lite, we reduced our project timeline by 25% and cut abrasive consumption by 10%, saving over \$20,000 on the first job.”
– Wenrich Painting

Q: Is the price for 2-4 operators a total price, rather than a price per outlet?

A: Correct - total price

Q: What are the pot requirements to utilize Intelliblast?

- Must have pressure-hold control system
- Tera or Thompson style abrasive metering valve
- Electric deadman
- Need to be in range of cellular service to transmit data

Q: Is it rugged enough for harsh jobsite environments?

A: Absolutely. The sensor is built to withstand dust, vibration, moisture, and physical impact.

Q: Is the “Subscription” option available for customer-owned pots if they pay for installation?

A: Yes

Q: Can I monitor multiple units or job sites at once?

A: Yes, the dashboard supports multiple units.

Q: Do I need a SIM card and WIFI?

A: The sensor comes with a pre-installed SIM card. The pot must be within cellular range.

Q: How do I access the data?

A: All data is stored securely in the cloud and can be accessed via an online dashboard.

Q: Can I export the data for reports or analysis?

A: Yes. Data can be exported for reporting, project tracking, or estimating.

Q: Is there a warranty that protects the purchased sensors?

A: Yes.

Q: Is there a simple list showing all the data the IntelliBlast lite tracks/reports on?

- Real-Time Insights / Archived Metrics
- Daily blast time metrics
- Blast pressure, and activation counts
- GPS / weather conditions
